

CBP ABI Software Vendors

January 13, 2025

U.S. Customs and
Border Protection

ABI Software Vendor List

The Office of International Trade has assembled a list of companies/persons offering data processing services to the trade community for the Automated Broker Interface (ABI). Inclusion on this list does not constitute any form of an endorsement by the U.S. Customs and Border Protection (CBP) as to the nature, extent or quality of the services that may be provided.

The information below lists software providers for ACE Entry (V), In-bond (IB), Document Image System (DIS), drawback (DB), Foreign Trade Zone (FTZ), Global Business Identifier (GBI), and Importer Security Filing (ISF) services who have developed or who will provide upon request software packages for handling ABI data. Also listed are Service Bureaus (SB) that act as a communications source for data transmission to ACE. These organizations are in the business of transmitting and receiving Customs data for ABI participants. ACE Entry (V) and Service Bureaus (SB) include ACE Entry Summary and ACE Cargo.

The organizations shown may not offer all the services available to ABI participants. Specific operational status and capabilities should be obtained from the specific organization. The decision to use a specific data processing service is strictly an individual user decision. Each ABI participant, regardless of the computer hardware and/or software used, may be required to successfully complete a period of intensive testing and qualification with Customs/ACE to be approved for various levels of ABI operations.

This list is updated approximately every two months.
