RE: U.S. Government Procurement; Country of Origin of Insufflation Tubing; Title III, Trade Agreements Act of 1979 (19 U.S.C. § 2511 *et seq.*); Subpart B, Part 177, CBP Regulations

DEAR Ms. ROOS:

This is in response to your correspondence dated March 26, 2018, requesting a final determination, on behalf of Global Resources International, Inc. (“Global Resources”), concerning the country of origin of certain insufflation tubing, pursuant to subpart B of Part 177 of the U.S. Customs and Border Protection (“CBP”) Regulations (19 C.F.R. § 177.21 *et seq.*).

We note that Global Resources is a party-at-interest within the meaning of 19 C.F.R. § 177.22(d)(1) and is entitled to request this final determination.

FACTS:

Global Resources is the importer of insufflation tubing. Insufflation tubing is used to interconnect and deliver carbon dioxide gas (“CO₂”) from the insufflator machine (CO₂ “gas pump” or insufflator) to the patient during laparoscopic surgery. Insufflation tubing is typically 3 meters (around 10 feet) in length, composed of a long clear plastic tubing and a short blue plastic tubing, with a filter attached about 30 centimeters (12 inches) from one end. The purpose of the filter is to prevent fluid backflow into the insufflator and to help prevent contaminants from entering the patient’s abdominal cavity. One end of the tubing is comprised of a male Luer lock fitting, which always connects to an instrument that is inserted into the patient’s abdomen. The other end connects to the insufflator, which may contain any number of types of fittings.

The country of origin of the clear tubing, blue tubing, filter assembly, and fittings is China. The insufflation tubing is assembled, sterilized, packed, and labeled in the Dominican Republic.

ISSUE:

What is the country of origin of the insufflation tubing for purposes of U.S. Government procurement?

LAW AND ANALYSIS:

CBP issues country of origin advisory rulings and final determinations as to whether an article is or would be a product of a designated country or instrumentality for the purposes of granting waivers of certain “Buy American” restrictions in U.S. law or practice for products offered for sale to the U.S. Government, pursuant to subpart B of Part 177, 19 C.F.R. § 177.21 *et seq.*, which implements Title III of the Trade Agreements Act of 1979 (“TAA”), as amended (19 U.S.C. § 2511 *et seq.*).

Under the rule of origin set forth under 19 U.S.C. § 2518(4)(B):

An article is a product of a country or instrumentality only if (i) it is wholly the growth, product, or manufacture of that country or instrumentality, or (ii) in the case of an article which consists in whole or in part of materials from another country or instrumentality, it has been substantially transformed into a new and different article of commerce with a name, character, or use distinct from that of the article or articles from which it was so transformed. *See also* 19 C.F.R. § 177.22(a).

In rendering advisory rulings and final determinations for purposes of U.S. Government procurement, CBP applies the provisions of subpart B of Part 177 consistent with the Federal Procurement Regulations. *See* 19 C.F.R. § 177.21. In this regard, CBP recognizes that the Federal Acquisition Regulations restrict the U.S. Government's purchase of products to U.S.-made or designated country end products for acquisitions subject to the TAA. The regulations define a "designated country end product" as:

WTO GPA [World Trade Organization Government Procurement Agreement] country end product, an FTA [Free Trade Agreement] country end product, a least developed country end product, or a Caribbean Basin country end product.

A "WTO GPA country end product" is defined as an article that:

(1) Is wholly the growth, product, or manufacture of a WTO GPA country;
or

(2) In the case of an article that consists in whole or in part of materials from another country, has been substantially transformed in a WTO GPA country into a new and different article of commerce with a name, character, or use distinct from that of the article or articles from which it was transformed. The term refers to a product offered for purchase under a supply contract, but for purposes of calculating the value of the end product includes services (except transportation services) incidental to the article, provided that the value of those incidental services does not exceed that of the article itself.

See 48 C.F.R. § 25.003.

The Dominican Republic is a WTO GPA country. China is not. You assert that the insufflation tubing at issue is a product of the Dominican Republic for U.S. Government procurement purposes because all of the components of insufflation tubing, sourced from China, meet the requisite tariff shift rules under the Dominican Republic-Central America-United States Free Trade Agreement ("DR-CAFTA"). Please note that this is an incorrect analysis to apply to determine the country of origin for U.S. Government procurement purposes. Rather, as set forth below, the relevant test is "substantial transformation."

In the Court of International Trade's decision in *Energizer Battery, Inc. v. United States*, 190 F. Supp. 3d 1308 (2016), the court interpreted the meaning of substantial transformation as used in the Trade Agreements Act of 1979 for purposes of government procurement. *Energizer* involved the determination of the country of origin of a flashlight, referred to as the Generation II flashlight, under the TAA. Other than a white LED and a hydrogen getter, all of the components of the Generation II flashlight were of Chinese origin. The components were imported into the United States where they were assembled into the finished Generation II flashlight.

The court reviewed the “name, character and use” test in determining whether a substantial transformation had occurred, and reviewed various court decisions involving substantial transformation determinations. The court noted, citing *Uniroyal, Inc. v. United States*, 3 CIT 220, 226, 542 F. Supp. 1026, 1031, *aff’d*, 702 F.2d 1022 (Fed. Cir. 1983), that when “the post-importation processing consists of assembly, courts have been reluctant to find a change in character, particularly when the imported articles do not undergo a physical change.” *Energizer* at 1318. In addition, the court noted that “when the end-use was pre-determined at the time of importation, courts have generally not found a change in use.” *Energizer* at 1319, citing as an example, *National Hand Tool Corp. v. United States*, 16 CIT 308, 310, *aff’d* 989 F.2d 1201 (Fed. Cir. 1993). Furthermore, courts have considered the nature of the assembly, *i.e.*, whether it is a simple assembly or more complex, such that individual parts lose their separate identities and become integral parts of a new article.

In reaching its decision in *Energizer*, the court examined whether the imported components retained their names after they were assembled into the finished Generation II flashlights. The court found “[t]he constitutive components of the Generation II flashlight do not lose their individual names as a result [of] the post-importation assembly.” The court also found that the components had a pre-determined end-use as parts and components of a Generation II flashlight at the time of importation and did not undergo a change in use due to the post-importation assembly process. Finally, the court did not find the assembly process to be sufficiently complex as to constitute a substantial transformation. Thus, the court found that Energizer’s imported components did not undergo a change in name, character, or use as a result of the post-importation assembly of the components into a finished Generation II flashlight. The court determined that China, the source of all but two components, was the correct country of origin of the finished Generation II flashlights under the government procurement provisions of the TAA.

The assembly process of insufflation tubing is similar to that of the Generation II flashlight in *Energizer*. All of the components are sourced from China, and there is no evidence of a change in the shape or material composition of the components. *See also* Headquarters Ruling Letter (“HQ”) H035441, dated September 11, 2008; and HQ 734214, dated November 18, 1991. In other words, the individual components do not lose their separate identities as a result of the assembly process in the Dominican Republic and do not undergo a change in their pre-determined uses. Considering the totality of the information provided to CBP, and relying upon the court’s application of substantial transformation in *Energizer*, we find that the country of origin of the assembled insufflation tubing, produced as described herein, is China.

HOLDING:

Based on the facts provided, insufflation tubing will be considered a product of China for purposes of U.S. Government procurement.

Notice of this final determination will be given in the **Federal Register**, as required by 19 C.F.R. § 177.29. Any party-at-interest other than the party which requested this final determination may request, pursuant to 19 C.F.R. § 177.31, that CBP reexamine the matter anew and issue a new final determination. Pursuant to 19 C.F.R. § 177.30, any party-at-interest may, within

30 days of publication of the **Federal Register** Notice referenced above, seek judicial review of this final determination before the Court of International Trade.

Sincerely,

ALICE A. KIPEL,

Executive Director

Overview of This Information Collection

Title: Entry/Immediate Delivery

OMB Number: 1651–0024.

Form Number: 3461 and 3461 ALT.

Current Actions: This submission is being made to extend the expiration date with no change in the data collected. There is an increase to the annual burden hours based on updated agency estimates. CBP previously submitted a 60 day **Federal Register** Notice with a change for this OMB control number. That change was an error and has been corrected. There is no change in the data collected under this submission.

Type of Review: Extension (without change).

Abstract: All items imported into the United States are subject to examination before entering the commerce of the United States. There are two procedures available to effect the release of imported merchandise, including “entry” pursuant to 19 U.S.C. 1484, and “immediate delivery” pursuant to 19 U.S.C. 1448(b). Under both procedures, CBP Forms 3461, Entry/Immediate Delivery, and 3461 ALT are the source documents in the packages presented to Customs and Border Protection (CBP). The information collected on CBP Forms 3461 and 3461 ALT allow CBP officers to verify that the information regarding the consignee and shipment is correct and that a bond is on file with CBP. CBP also uses these forms to close out the manifest and to establish the obligation to pay estimated duties in the time period prescribed by law or regulation. CBP Form 3461 is also a delivery authorization document and is given to the importing carrier to authorize the release of the merchandise.

CBP Forms 3461 and 3461 ALT are provided for by 19 CFR 141 and 142. These forms and instructions for Form 3461 are accessible at: <https://www.cbp.gov/newsroom/publications/forms?title=3461&=Apply>.

ACE Cargo Release is a program for ACE entry summary filers in which importers or brokers may file Simplified Entry data in lieu of filing the CBP Form 3461. This data consists of 12 required elements: Importer of record; buyer name and address; buyer employer identification number (consignee number), seller name and address; manufacturer/supplier name and address; Harmonized Tariff Schedule 10-digit number; country of origin; bill of lading; house air waybill number; bill of lading issuer code; entry number; entry type; and estimated shipment value. Three optional data elements are the container stuffing location; consolidator name and address, and ship to party name and address. The data collected under the ACE Cargo Release program is intended to reduce transaction costs, expedite cargo release, and enhance cargo security. ACE Cargo Release filing minimizes the redundancy of data submitted by the filer to CBP through receiving carrier data from the carrier. This design allows the participants to file earlier in the transportation flow. Guidance on using ACE Cargo Release may be found at <http://www.cbp.gov/trade/ace/features>.

Title: Customs Declaration.

OMB Number: 1651-0009.

Form Number: CBP Form 6059B.

Abstract: CBP Form 6059B, Customs Declaration, is used as a standard report of the identity and residence of each person arriving in the United States. This form is also used to declare imported articles to U.S. Customs and Border Protection (CBP) in accordance with 19 CFR 122.27, 148.12, 148.13, 148.110, 148.111; 31 U.S.C. 5316 and section 498 of the Tariff Act of 1930, as amended (19 U.S.C. 1498).

Section 148.13 of the CBP regulations prescribes the use of the CBP Form 6059B when a written declaration is required of a traveler entering the United States. Generally, written declarations are required from travelers arriving by air or sea. Section 148.12 requires verbal declarations from travelers entering the United States. Generally, verbal declarations are required from travelers arriving by land. CBP continues to find ways to improve the entry process through the use of mobile technology to ensure it is safe and efficient. To that end, CBP is testing the operational effectiveness of a process which allows travelers to use a mobile app to submit information to CBP prior to arrival. This process, called Mobile Passport Control (MPC) which is a mobile app that allows travelers to self-segment upon arrival into the United States—a process also known as intelligent queuing. Another electronic process that CBP is testing in lieu of the paper 6059B is the Automated Passport Control (APC). This is a CBP program that facilitates the entry process for travelers by

providing self-service kiosks in CBP's Primary Inspection area that travelers can use to make their declaration.
