Understanding ACE User Roles

The “*User Access*” view within the Automated Commercial Environment (ACE) Secure Data Portal provides the ability among other things for the set up of multiple trade user roles. Within this view the Trade Account Owner (TAO) or Proxy Trade Account Owner (PTAO) can create contacts and create/maintain account users.

Currently the available trade user roles in the ACE Portal include:

- **Trade Account Owner:** Person who has ACE Portal access via a user identification (ID) and password. The TAO can update the Business Activity Log, the Action Plan and the account structure, as well as manage and create account users and proxy trade account owners within the account. The TAO can also serve as a contact on the account and will receive all notifications pertaining to the account.
- **Proxy Trade Account Owner:** Person who has ACE Portal access via a user ID and password. The PTAO can update the Business Activity Log, Action Plan and the account structure, as well as manage and create account users. The PTAO can also serve as a contact on the account where desired. A PTAO can perform the same tasks as the TAO with the exception of creating another PTAO. The PTAO also does not have access to the Cross Account Access and the Merge Accounts tab.
- **Account User:** Person who has ACE Portal access via a user ID and password. The account user has “read/write” access to the Business Activity Log and Action

Plan, if granted by the TAO or the PTAO. The account user can also serve as a contact on the account where desired.

- **Trade Contact:** Person who does not have access to the ACE Portal, thus they do not have a user ID and password. The trade contact's information is displayed in the ACE Portal as a reference contact for one or more parts of the trade account.

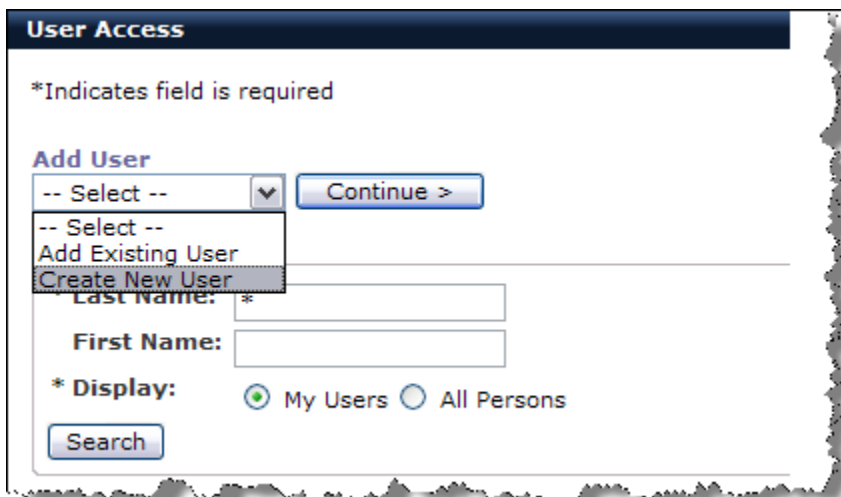

Creating New Users

Only the TAO or PTAO can add new users to the account and assign access permissions.

1. Select the **Tools** tab.
2. Select **User Access** located under "User Account Administration."

3. The "User Access" portlet displays. Select the drop down arrow under "Add User."
4. Select **Create New User**.

5. Select the **Continue** button.
6. Complete the contact information for the user.

All fields preceded by an asterisk () within the ACE Secure Data Portal are required fields.*

7. Select the **Save and Continue** button.

If the address you enter does not conform to the US Postal Service format, ACE will standardize the address and generate the following message: **Address has been standardized**

If the address you enter is not recognized by the US Postal Service, ACE will generate an error message such as:

Invalid Postal Code. Do you mean: 22202-2872

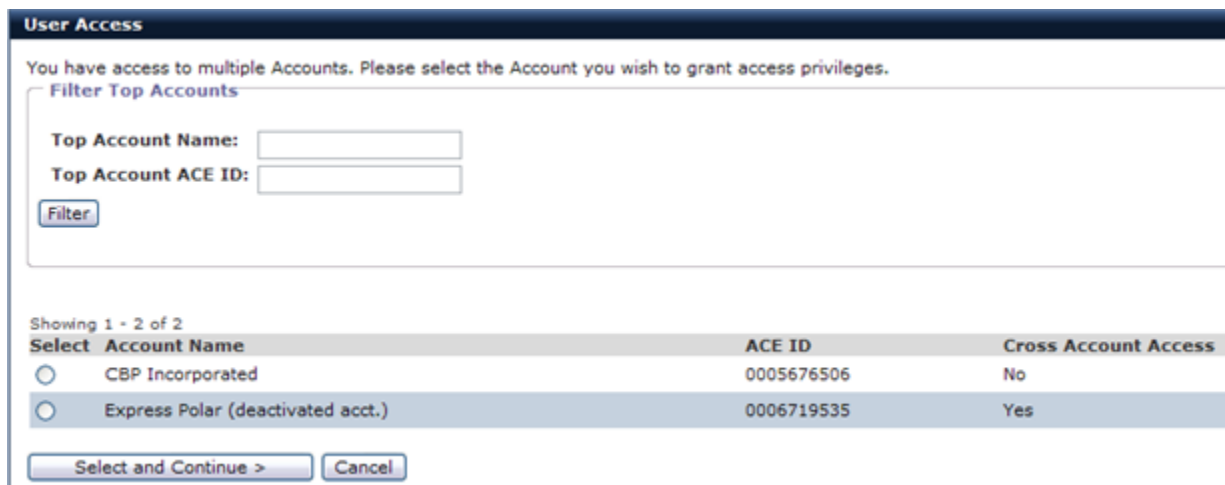

If the error message is valid, make the correction and select **Save and Continue** again.

If you are certain the address is correct as entered, check the following checkbox:

Use Address As Entered

8. A screen will display showing your Top Account(s). If you have access to more than one Top Account, you will be required to select the account to which you wish to grant access privileges.

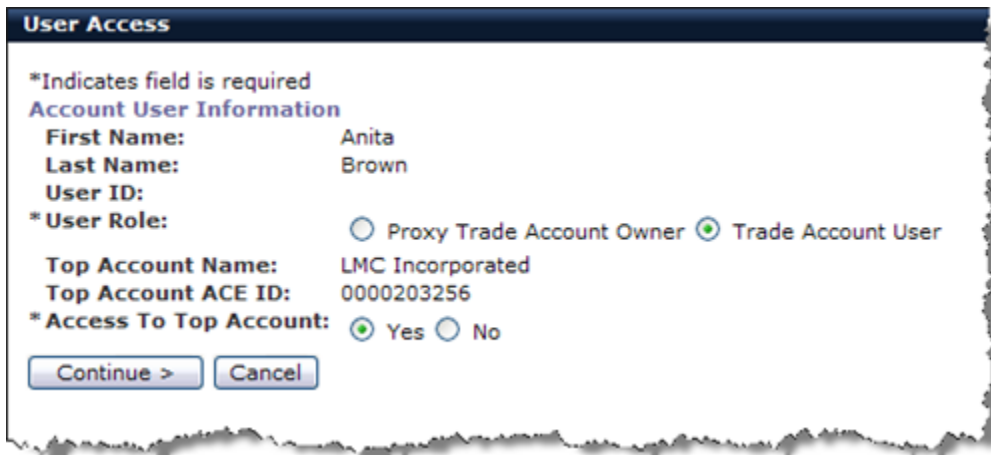

The screenshot shows a web interface titled "User Access". It contains a message: "You have access to multiple Accounts. Please select the Account you wish to grant access privileges." Below this is a section for filtering top accounts with input fields for "Top Account Name" and "Top Account ACE ID", and a "Filter" button. At the bottom of the filter section, it says "Showing 1 - 2 of 2". Below that is a table with three columns: "Select", "Account Name", "ACE ID", and "Cross Account Access".

Select	Account Name	ACE ID	Cross Account Access
<input type="radio"/>	CBP Incorporated	0005676506	No
<input type="radio"/>	Express Polar (deactivated acct.)	0006719535	Yes

At the bottom of the screen are two buttons: "Select and Continue >" and "Cancel".

9. Select the **Select and Continue** button.

10. Another screen displays requiring you to set the user's role. Select either Proxy Trade Account Owner or Trade Account User. (Note: PTAO will not have the option to select "Proxy Trade Account Owner".)

User Access

*Indicates field is required

Account User Information

First Name: Anita
Last Name: Brown
User ID:
*** User Role:** Proxy Trade Account Owner Trade Account User
Top Account Name: LMC Incorporated
Top Account ACE ID: 0000203256
*** Access To Top Account:** Yes No

11. Indicate whether you want to provide the user with access to the Top Account by either selecting or not selecting the radio button.
12. Select the **Continue** button.
13. A screen displays allowing you to set specific functionality permissions for this user. You can use the account type sub-tabs to specify permissions at the account type level. You can also select the “*Full Access for All*” button to grant the user access to all Importer of Record numbers (IR numbers) and any other accounts under this Top Account. Select the “*Read-Only Access for All*” to allow the user to view, but not modify, all data in the account. When you select “*Full Access for All*” or “*Read-Only Access for All*” access to the ISF Portal will be set as “Yes” and all ISF portal roles will be granted.

14. Select the **Save** button on the bottom left of the screen. (You may need to scroll down to see this button.)
15. You are returned to the original “*User Access*” screen.

Adding Existing Users to an Account

In addition to creating new users, TAOs and PTAOs can add an exiting user to their portal account.

An existing user is someone who already has an ACE user ID and password. In order to add an existing ACE user, you will need the user's first name, last name and ACE user ID. If you do not have the existing user's ACE user ID, contact the user for this information.

1. Select the **Tools** tab.
2. Select **User Access** located under "User Account Administration."
3. The "User Access" portlet displays. Select the drop-down arrow under "Add User."
4. Select **Add Existing User**.

14. Select the **Save** button on the bottom left of the screen. (You may need to scroll down to see this button.)
15. You are returned to the original "User Access" screen.

Granting/Updating Account Access to Users

The TAO or PTAO must set user permissions by account-type. This can be done by accessing the specific account types and indicating what permissions are granted for each account.

If you select either the “*Read-Only Access for All*” accounts or the “*Full Access for All*” accounts, you can still tailor the access level for a specific account by using the “*Edit Permissions*” link on each account type sub-tab.

To grant specific access privileges follow the steps listed below:

1. Select the **Tools** tab.
2. Select **User Access**.
3. Your list of users displays. Select the user’s last name link in the “*Last Name*” column.
4. If you have access to more than one Top Account, you will be required to select the account to which you wish to grant access. Select the radio button for the Top Account to which you wish to grant access.
5. Select the **Select and Continue** button.
6. This screen indicates the user’s current role and whether or not they have access to the Top Account. Select the **Continue** button.
7. Now you can see the current access rights for this user. Select the scroll bar to view all details. To update the user’s access to include two new IR#s, select the **Importer** sub-tab.

The default when granting access privileges is “No Access.”

8. The “*Importer*” sub-tab displays a list of IR numbers with authorized access. Select the scroll bar to view all the details.
9. To update this list, select the **Edit Importer Permissions** link.

10. Select the IR numbers from the list of “*Available IR#s*.”
11. Select the **Add** button and the IR# will move to the “*Selected*” box. Repeat this process until you’ve added all of the IR#s you wish to add to the “*Selected*” box.
12. Select the **Continue** button.

13. This screen shows the IR#s you just added. To grant access to other account types, select the sub-tab for that account type. When you are finished granting access, select the **Save** button.
14. The IR#s are now listed under the heading “*Authorized IR Access.*” You have successfully updated this user.

Filtering Users and Contacts

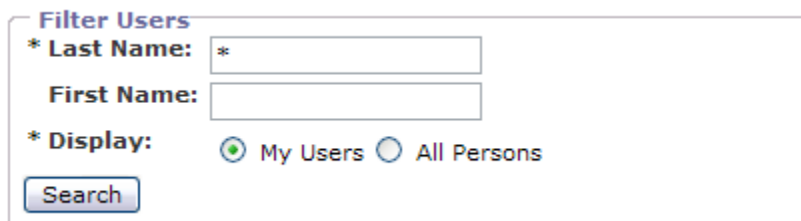

You can filter your users and contacts in ACE by using the “*Filter Users*” portlet on the “*User Access*” link.

1. Select the **Tools** tab.
2. Select **User Access**.
3. The Filter Users portlet displays on the User Access tab. Type a last name in the “*Last Name*” field.

Conduct a wildcard search using an asterisk () as a wildcard at the beginning, middle, or end of a string of characters. For example, searching for *son will return Erickson, Jackson, Johnson, etc.*

4. Select a “*Display*” option.
5. Select the **Search** button. Your users/contacts are now filtered to match your criteria. If you select “*My Users*” all current users with ACE Portal access who have “*son*” in their last name will be displayed.

Filter Users
* Last Name:
First Name:
* Display: My Users All Persons

“My Users” will search users (people with ACE Portal access) associated with your account. “All Persons” will search all users and contacts associated with your account, including users whose access has been revoked.

Revoking User Access

As a TAO or PTAO, you can revoke a user’s access to all accounts.

1. Select the **Tools** tab.
2. Select **User Access**.
3. Your list of users displays. Select the user’s last name link in the “*Last Name*” column. (If your list of users is lengthy, you will want to search for the user.)

4. A screen displays showing your Top Account(s). If you have access to more than one Top Account, you will be required to select the account whose access you wish to revoke.
5. Select the **Select and Continue** button.
6. The User Access portlet displays with this user's details. Select the **Continue** button.
7. The User Access portlet displays with the manage user options. Select the **Revoke Access** button.

Selecting the **Revoke Access** button will remove this user from all accounts.

8. Select the **OK** button to confirm.

Granting Access to the ISF Portal to an Existing User

Modifications have been made to the “*User Access*” portlet to accommodate granting access to the ISF Portal. To grant access to the ISF Portal to an existing user, follow the steps below:

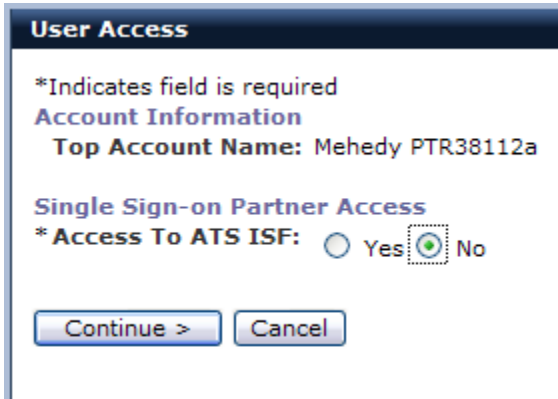

1. Select the **Tools** tab.
2. Select **User Access**.
3. A list of users displays. Select the user's last name link in the “*Last Name*” column.
4. If you have access to more than one Top Account, you will be required to select the account to which you wish to grant access.
5. Select the **Select and Continue** button.
6. A screen displays indicating the user's current role and whether or not the user has access to the Top Account. Select the **Continue** button.
7. The “*Account User Information*” portlet displays.

8. Select the **Edit** button in the Single Sign-on Partner Access portlet to assign individual access privileges.

Providing the Right Information to the Right People at the Right Time and Place

- A new screen will display. Change the radio button to **Yes** for “Access to ATS ISF” and select **Continue**.

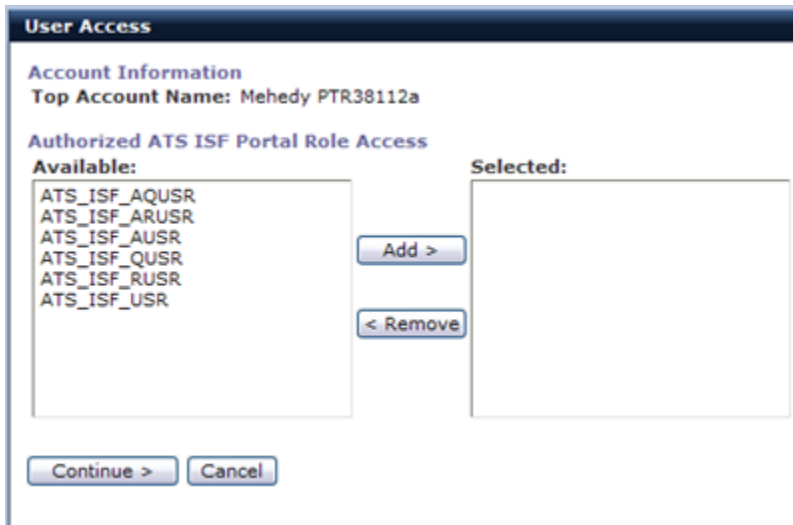

User Access

Authorized ATS ISF Portal Role Access

Available:

- ATS_ISF_AQUSR
- ATS_ISF_ARUSR
- ATS_ISF_AUSR
- ATS_ISF_QUSR
- ATS_ISF_RUSR
- ATS_ISF_USR

Selected:

- Role definitions are as follows:

Role	Definition
ATS_ISF_AQUSR	Advanced Query User – This role is TBD.
ATS_ISF_ARUSR	Advanced Report User – This role is for C-TPAT Tier 3 Importers, Users will have access to ISF transaction reporting capabilities (this functionality is planned for the future)
ATS_ISF_AUSR	Advanced User – This role is TBD.
ATS_ISF_QUSR	Query User – This role is for a user to

	query the status of their ISF by transaction and bill of lading number (this functionality is planned for the future).
ATS_ISF_RUSR	Report User – This role is for VOCs, NVOCCs, Importers, Sureties, Brokers and Filers. Users will have the ability to view standard progress reports.
ATS_ISF_USR	User – This role is for small importers only. Small importers will have the ability to file and amend an ISF through the ISF Portal. Note: No more than 12 ISFs can be filed a year through the ISF Portal.

13. Select the **Continue** button.
14. When you are finished granting access, select the **Save** button.
15. You can also assign access privileges by selecting either the **Read-Only Access for All** button or the **Full Access for All** button.
16. When you select the **Read-Only Access for All** button, access to the ISF Portal will be set as “Yes” and all ISF portal roles will be granted.
17. When you select the **Full Access for All** button, access to the ISF Portal will be set as “Yes” and all ISF portal roles will be granted.
18. When you select the **Revoke Access** button, access to ISF Portal will be set as “No” and all ISF portal roles will be revoked.

Revoking Access to the ISF Portal

As a TAO or PTAO, you can revoke a user’s access to all accounts.

1. Select the **Tools** tab.
2. Select **User Access**.
3. A list of users displays. Select the user’s last name link in the “*Last Name*” column.
4. If you have access to more than one Top Account, you will be required to select the account to which you wish to grant access.
5. Select the **Select and Continue** button.
6. A screen displays indicating the user’s current role and whether or not the user has access to the Top Account. Select the **Continue** button.
7. The “*Account User Information*” portlet displays.

Finding Users and Contacts Who Access Your Account

You can search for your users and contacts in ACE by using the “*Find Users*” portlet under “*User Account Administration*” found under the “*Tools*” tab.

1. Select the **Tools** tab.
2. Select **Find Users** located under “*User Account Administration.*”
3. A portlet displays where you can enter account information and locate users who have access to your account(s). You can search by ACE ID, IR Number, Filer Code, or Standard Carrier Alpha Code (SCAC) ID. Each of these searches requires you to enter a data range in two fields.

To find users for a specific number, ID, or code, you must enter that number in both fields.

4. Select the **Search** button. Your search results display.

Searches are conducted on people who have been granted access to your account.

Additional ACE Resources

For additional assistance, take the available web-based training (WBT).

The URL for the ACE Online Training Center is:

http://nemo.cbp.gov/ace_online

The screenshot shows the ACE Online Training Center interface. At the top, there is a header with the ACE logo and the text "ACE Online". Below the header, there is a section titled "ACE Web-based Training (WBT)" with a welcome message and technical specifications. To the right, there is a list of available courses, each with a corresponding icon and a label in a yellow circle. The courses listed are:

- ACE Initial Login (ACE)
- Periodic Payments (R3)
- e-Manifest: Trucks (R4)
- e-Manifiesto: Camiones (R4_{sp})
- ACE Reports for the Trade Community (pencil icon)
- Enhanced ACE Accounts & Master Data (A1)
- Multi-Modal Manifest & ESAR Enhancements (A2)
- Forms, Declarations & AD/CVD Cases (A2.3.1)
- Post Summary Corrections (A2.3.2)
- e-Manifest: Rail & Sea (M1)
- e-Manifiesto: Ferrocarril y Marítimo (M1_{sp})

Do you need additional assistance with Managing User Access? If you are a trade caller or if you are calling outside the United States, please contact Technology Service Desk at 1-866-530-4172.
